EXPERIENCE

OMNIZANT | Customer Support Specialist | Port Washington, NY | May 2021 – April 2021

- Support by telephone and email to clients.
- Updated sites in WordPress as well as Omnizant's proprietary platform, adding and removing content and users, updating graphics, reworking menus, and PHP work to update themes
- Learned the options of the Gravity Forms plugin, including how to set up forms, connect to outside CRMs and became a subject matter expert on them
- Dealt with customers with domain registration questions such as renewals and transfers to other registrars.
- Handled email account questions and requests, such as account creations and deletions on RackSpace, IONOS and Enom.
- Learned PHP as it is used in WordPress to increase ability to make updates and help fix issues for clients.

MAKERBOT INDUSTRIES | Customer Advocate | Brooklyn, NY | December 2017 – July 2020

- Provided support by telephone, email, and chat to MakerBot customers, supporting their 3d Printing hardware and software
- Advocated on behalf customers with internal staff, providing information and documentation on technical issues with both software and hardware that needed addressed by development groups
- Handled sales of spare parts and accessories to assist customers with requests and requirements

DOCUSIGN | Technical Support Agent Level II | Seattle, WA | May 2015 – January 2017

- Provided telephone and email technical support for the DocuSign online signature platform and service.
- Received training equivalent to the DocuSign Certified Administrator certification.
- Gained Salesforce operational experience including troubleshooting the DocuSign for Salesforce connector.
- Created internal documents to assist with troubleshooting internal and external use.

WDS | Technical Support | Seattle, WA | November 2013 – December 2014

- Provided remote technical support to end-users using Android Nexus mobile products (phones/tablets) and Google's Chromecast video streaming solution.
- Diagnosed problems, walked customers through programming procedures, explained product features and capabilities.
- Served as a Subject Matter Expert to the internal support-site update demonstrating the set up and use of the Chromecast device.

FREELANCE | Seattle, WA | July 2010 – November 2013

- Technical consulting for small art studio.
- Operating System upgrade and restore for education professionals.
- Technical editing for software documentation to increase ease-of-use and speed installation and configuration.
- Prepared documentation for marketing proposals in Keynote.

CITIGROUP | New York, NY | July 2001 – July 2010**Senior Technical Analyst, LAN Operations, 2008 – 2010**

- Oversaw enterprise systems and installation of applications and network connectivity for operations supporting over 100 workstations; assist and lead configuration, implementation, documentation, and maintenance of network infrastructure, Microsoft, and Mac operating systems.
- Provided Tier 1/2/3 hardware/software/connectivity customer support and issue resolution; opened and tracked trouble tickets, provided follow up and acted as point of escalation for advanced issues.
- Partnered with technical teams to determine IT support priorities and technical roadmaps for projects; developed daily work schedules and ongoing project plans.
- Optimized and maintained systems, utilized network management applications, ensured server patches were up-to-date and systems were secured.
- Developed archival standards and practices and managed system backup and restore, documented disaster recovery plan.
- Collaborated with cross-functional teams to identify and diagnose networking and hardware issues, developed fixes that reduced system downtime and improved functionality.
- Created and maintained system documentation to ensure system changes are updated.

Security Administrator, 2004 – 2008

- Performed daily Information Security functions pertaining to computer access control on numerous security software products and processes, planned business continuity and managed compliance frameworks.
- Processed computer access forms, password resets, security model updates, user account initiations and terminations, monitoring and reviewing access violation and security maintenance reports.
- Validated security controls, assessed and mitigated risks, maintained security and programs, and managed chain of trusts.
- Utilized network monitoring systems and implemented/managed Access Control List (ACL) and Role Based Access Control (RBAC).
- Reviewed audit recommendations and requests, analyzed issues, and initiated recommendations for security compliance and policies and/or alternatives to department management.
